**Subject:** FW: NHPA and ESA Steps - from today's call

Whitney,

I would like to go over this list with you soon and see how it pencils out vis a vis the ICR. I don't think it should take too long for just you and me to go over the steps outlined here before I write them up. I want to go through the draft and see where and how it will change. I don't want to take much of your time but this is all a bit cryptic to me although gaining clarity as we go. ☺

Based upon today's call, I've added after each bullet who has burden associated with each bullet and highlighted that in yellow.

I also added context and specificity to some items and those are in blue.

Hi all,

Just recirculating this message in case it's helpful for facilitating discussion on the EA this morning.

Best,  
Whitney

**Subject:** NHPA and ESA Steps

Hi all,

We talked last week about reflecting the "Florida Experience" for NHPA and ESA consultation when developing estimates/descriptions for the EA/ICR. As promised, I'm listing the pieces of paper (**bold + underlined**) and steps that Florida is taking for NHPA and ESA consultation to facilitate conversation at this Thursday's meeting. Kathy may have

more to add. NHPA has more “steps” in our timeline but ESA is the bigger time lift in Florida’s case because of the complexity of their Biological Evaluation.
